

Traumatic Brain Injury

Est. Time: 1.5 Hours

Objective

To become aware of the causes, characteristics, and treatments of traumatic brain injury (TBI).

Overview

Because TBI is not well understood, many misconceptions surround it. This activity is designed to increase awareness of those misconceptions and enhance knowledge of the specific characteristics and causes of TBI.

Questions/Discussion Topics

1. What characteristics come to your mind when you think of someone with TBI? Make a list of those characteristics.
2. Do a search on the Internet for traumatic brain injury. Then create a chart that includes causes, characteristics, and facts about TBI in school-age children.
3. Compare your chart with the list you made before you started the Internet search. What was different?
