## SAMPLE

## Frequency Recording Form

Student: $\qquad$
Class/ Teacher: $\qquad$ Observer: $\qquad$
Behavior: $\qquad$
Instructions: Make a mark each time the behavior occurs. To calculate rate ${ }^{1}$, divide the total number of occurrences by the length of the observation.

| Date | Time started | Time ended | Total time | Tally | Total occurrences | Rate |

Additional comments:

[^0]
[^0]:    ${ }^{1}$ If the observation periods are the same length, rate calculations might not be necessary.
