## SAMPLE

## Speed or Rate Recording Form

Student: $\qquad$
Class/Teacher: $\qquad$ Observer: $\qquad$
Instructions: Record the total time it took the student to complete the task and the number of items correct (e.g., number of problems correct, number of words read correctly). To calculate the speed or rate, divide the number of items correct by the total time to complete the task.

| Date | Number of Items Correct | Total Time | Speed or Rate |
| :--- | :--- | :--- | :--- |
| $4 / 03$ | 15 | 30 min | .5 problems correct per minute |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  | Total/Average: |
|  |  |  |  |
|  |  |  |  |
